IN MEMORIAM

Died at Calgary Hospital on Friday, July 1st, Ethel McLean Thorburn, aged 43 yrs.

Seldom has it been a more painful duty to record so sudden a death. A dark gloom spread over the whole community when it was whispered from one another that Mrs Thorburn was gone.

Mrs Thorburn was an every day christian. Whenever there was anything to do for the welfare of the Church or Community, or anything was organized where self-sacrifices and hard work was needed, Mrs Thorburn was always in the forefront.

The funeral took place in Calgary, Tuesday, July 5th.

The officiating clergymen at the Service were Revs Shearer and Robertson. The Call Bearers were: A. Fletcher, R. Heath, J. Ramsay, and Chas. Burnett.

The floral offerings were beautiful and many: Carbon friends, wreath; Husband, pillow; Mr and Mrs Evans, anchor; Mr and Mrs W. Douglass, gates ajar; Mr. and Mrs R. Heath, wreath. Brothers and Sisters, cross; Ladies Aid, Carbon, spray; Mr and Mrs L. W. Wilson, spray; Mr and Mrs W. J. Gordon, spray; Mr L. Fowler, spray; Mr L. E. Sanderson, spray; Mrs Beveridge, spray; Miss Marguerite Wilson, wreath; Sister Margaret, Millie, Hester, spray; Mr and Mrs Shaw, star.

These flowers so typical of the life of her we mourn, mutely speak the pathos of a parting world, and are placed upon the casket by friends who loved her. On these petals are tears for the parting and hopes for the meeting beyond the gates.

The Carbon Lodge No 107, I. F. and A. M. will attend English Church Service July 10th. The brethren will meet at the Lodge room at 7 p. m.

The Church of England will hold Divine Service in the Farmer's Exchange Hall on Sunday next, July 10th at 7.30 p.m.

Special music. The Carbon Masonic Lodge will attend.

Rev. D. F. R. Robertson attended a Presbyterian meeting in Calgary Tuesday.

WEDDING

TORRANCE - HAY

A very pretty wedding was solemnized at the Central Methodist Church, Calgary, Wednesday June 29th 1921, when Ethel Phyllis, only daughter of Mr and Mrs Alex Hay of Carbon, was united in marriage to Stanley Floyd Torrance. The Rev Charles Sykes officiated.

The bride, who looked charming in a navy blue tricot suit and jade green hat, carried a bouquet of Ophelia roses and pink carnations tied with white streamers. Miss Nora Kittleson acted as bridesmaid and carried a bouquet of Ophelia roses and maiden hair fern. Mr Geo. McNeil supported the groom. The groom's gift to the bride was a leather club bag, to the bridesmaid an Onyx bar pin, and to the best man a Masonic ring. Mr and Mrs Torrance after a short honeymoon to Toronto will make their home in Carbon, Alta.

GROCERIES, BAKERY & CONFECTIONERY

A Justifiable Postponement

The Directors of the Western Canada Colonization Association are to be commended for their action in postponing the actual work of bringing in settlers until they secure from the prairie provinces a reasonably firm price list of unoccupied lands available for sale. The Association will not be warranted in expending the large sum of money subscribed by its backers until it secures reasonable co-operation from the three Governments. It would be nothing short of a disaster if lack of action by the Manitoba, Saskatchewan and Alberta Legislatures should prevent the use of this great fund for the general advantage of the Canadian West.

We look to see the forthcoming conference of prairie province Premiers agree upon some workable basis of action that will facilitate the operations of the Western Canada Colonization Association, as of other immigration agencies. The sooner the twenty million acres of idle land near the railways, now held out of production by more than eighty thousand individual speculators, is brought under the plow, the sooner will good times return, the burden of taxation be lightened and the National Railways achieve a self-supporting basis.

Remarkable Trip In Overland Car

Overland tours of 75,000 miles are not common among Canadian automobile owners but one was completed this month, that took in territory from coast to coast, north as far as Edmonton and south to Lower California.

Mr. J. T. Pears, who was in business in Toronto for many years, undertook the trip chiefly for his health's sake and was accompanied by Mr. Roy M. Jones. After preliminary tours through Muskoka, Montreal and the Adirondacks to the Atlantic, they commenced their long trip by way of Chicago and St. Louis and then North again to Winnipeg. Crossing the Rockies through the Crows Nest Pass, they visited Vancouver and proceeded to Los Angeles.

Sleeping in the car every night

proved a wonderful tonic, and they thoroughly enjoyed the trip, which was not marred by a single accident. They were always able to obtain gasoline and neither mountains nor deserts proved an obstacle to their "90" Sedan. After several months in California, every district being visited, Mr. Pears and Mr. Jones returned by the New Mexico and Colorado route, averaging about 125 miles a day.

They brought back two monkeys, one an Australian Java, the other a Philippines Ringtail, which were photographed on top of the car when driven up to the Toronto branch of the Willys Overland Company. The monkeys, Mr. Pears states are becoming accustomed to their new home very quickly.

Wind On the Stomach Quickly Relieved

It is a good thing to know just what to do when gas belching starts. One sufferer relates the following experience: "A few months ago I ate some green vegetables and some fruits that was not quite ripe. It brought on indigestion, hiccoughs, nausea and cramps. I belched gas continually. A neighbor urged me to use 'Nerviline,' I took it in hot sweetened water, and got quick relief. I will never again be without this valuable remedy." Nerviline is a household necessity. Large 35c bottles sold everywhere.

A Waste.

"Closest is the stingiest man I ever knew. He smoked his cigars to the last half inch, chewed the stumps and brushed his teeth with the ashes. Even then he wasn't satisfied and stopped smoking."

"Why?"

"He couldn't think of any way to utilize the smoke."

Saskatchewan Rifle Association Meet

Attractive Prize List Offered at Meeting at Regina, July 18th to 20th.

The annual Saskatchewan Provincial Rifle Association meet will be held at Regina on July 18, 19 and 20. \$2,000 are offered in prizes. Ammunition will be supplied free with plenty of opportunity for practice. The S.M.L.E. rifle will be used. Prize lists can be had from Major Styles, the secretary at Regina.

Suspense.

She.—Tell me, Jack, am I the first

He.—Wait—

She.—Don't stop me. Am I the first girl who ever asked you if she was the first girl you ever kissed?—Judge.

Europe and North America use nearly four-fifths of all the coffee the world produces.

Get Together Results

Benefit Derived From the Accredited Herd Plan for Control of Tuberculosis in Cattle.

A few years ago the United States breeders of pure-bred cattle, recognizing the necessity of more effective measures for the control of tuberculosis, arranged a conference with officials of the Bureau of Animal Industry at Washington, the result of which was the adoption of what is known as the Accredited Herd Plan, meaning that the herd had been thoroughly tested and found entirely free from any symptoms of tuberculosis. The plan proved so successful (over a thousand herds being accredited in a brief period) that a decision was arrived at to adopt the system in Canada. Regulations were promulgated which came into force in September, 1919, and have proved gratifyingly successful, a number of herds having been accredited while many others are under test. There is now an agreement between Canada and the United States that cattle from accredited herds may enter either way, without detention or test.

Farthest North Bank

Union Bank Will Open a Branch at Fort Smith, in Latitude Sixty Degrees North.

Carrying bank accommodation for the first time into the northern oil district, the Union Bank of Canada will open a branch at Fort Smith, in latitude sixty degrees north. It is not to be expected that the Fort Smith Branch of the Union Bank can become a profitable venture, particularly in its initial stages, but it is characteristic of Canadian banking that the banker should accompany the forerunner of civilization and development in any movement tending towards national progress.

THIN, WATERY BLOOD MEANS ILL HEALTH

Rich, Red Blood Brings Bright Eyes and Rosy Cheeks.

The girl who returns home from school or from work thoroughly tired out will be fortunate if she escapes a physical breakdown, because this getting tired so easily is probably the first warning symptom of a thinning blood that must not be disregarded if her health is to be preserved.

When the blood becomes thin and impure the patient becomes pale. She not only tires out easily but often suffers from headaches, palpitation of the heart, dizzy spells and a loss of appetite.

In this condition Dr. Williams' Pink Pills will be found to have a beneficial action on the blood. Miss Delima Lafreniere, St. Ambrose, Man., has proved this in her own case, and advises others to use these pills. She says: "Before I began the use of Dr. Williams' Pink Pills I felt like a complete wreck of my former self. My blood was poor and thin. I suffered from faint and dizzy spells, and had backaches and headaches almost every day. I decided to give Dr. Williams' Pink Pills a trial, and by the time I had used three boxes I felt much better and I continued taking the pills until I felt as well as I ever did. For what they did in my case I cannot recommend these pills too highly."

Dr. Williams' Pink Pills can be obtained from any dealer in medicine, or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Air Harbor For Regina.

The establishment of a municipal air harbor at Regina is now all but an accomplished fact, and of two sites submitted by the city to the Canadian Air Force Association, the association selected one comprising about one hundred acres. All that remains to complete arrangements is the receiving and erection of the Bessoneau hangar, which has been reserved for Regina by the Canadian Air Board.

Will Direct Traffic to Canada.

The drastic immigration restrictions which have recently come into effect in the United States will, it is thought, have a natural sequence in the diversion of the superfluous flow to Canada. Authorities are also of the opinion that the rigid enforcement of the act will result in the transferring of some of the vessels of the New York-trans-Atlantic fleet to the port of Montreal.

Manitoba Farmer Now So Strong He Can Put In Full Time at Work

"I was beginning to think I never would be myself again but Tanlac has put me back in as good health as I ever enjoyed in my life," said John Brown, well-known farmer of Saint Clair, Manitoba.

"I had a bad stomach and it had been troubling me for the past two and a half years. My appetite was fairly good; that is, I could eat but it looked like everything turned against me and brought on indigestion. Gas formed and would bloat me up something awful. I slept poorly, lost weight, and got so weak I couldn't half do my work on the farm.

"Well, I'm mighty glad Tanlac came my way. I saw before I finished my first bottle that it was doing me good and now I feel as strong and healthy as I used to be years ago. My stomach never gives me any more trouble and I eat three good rousing meals a day like a hard working man ought to.

"I sleep fine, have picked up considerably in weight and can put in full time at work every day now. Tanlac gets all the credit for my good health today. To my way of thinking there is not a medicine that can compare with it."

Tanlac is sold by leading druggists everywhere.

You will enjoy the flavor the reason is inside the package.

The Godville Company Ltd.

The Endurance of Your Automobile, Truck, or Tractor

Depends not only upon the time of Lubrication, but the kind of Lubrication.

WHITMORE'S AUTO GEAR PROTECTIVE COMPOSITION

Adds 500% to Gear Life. Thousands of tests have been conducted by Lubricating experts to demonstrate the relative efficiency of various lubricants. The results of these tests conducted over years, has fixed the choice of sixteen leading manufacturers. These manufacturers include:

The largest builder of fine cars in the world;
The largest builder of trucks in the world;
The largest builder of axles in the world;
The largest builder of worm gears in the world.

Many lubricants contain acid. They not only fail to counteract friction, but are themselves harmful and corrosive to gear and bearing surfaces.

Whitmore's Auto Gear Compositions Contain No Acids

They are proof against heat and cannot break down or squeeze out. In the Panama Canal Emergency Dams, six million pounds rest on an unbroken film of WHITMORE'S. After an exhaustive test the U.S. Army contracted for its exclusive use. Manufactured by The Whitmore Manufacturing Co., Lubricating Engineers, Cleveland, Ohio.

CHAPTER I.

The Beck of Fortune.

The last congratulations had been offered; the last good wishes, somewhat mixed with tears, had been expressed. The bride, glowing in the happy consciousness of her own beauty, and deified by the great tenderness that enveloped her new estate like a golden mist, said her farewells with steady voice and undrooping eyes. Once only, when two frail arms drew her to the great mother-heart that was fighting with joy and unspoken sorrow through its travail of the soul, did their bright rays moisten and tremble like sun-shafts in a pool. It was for the moment only; one hallowing kiss on the dear, white cheek; then, with uplifted head, she said good-bye, and the mother smiled upon her in a pride that was deeper than her pain. The breed that had not feared, a generation back, to cross the seas and carve a province and a future from the forest, was not a breed to withhold its most beautiful and noble from the ventures of the greater West.

It had been a busy winter for John Harris, and this, although the consummation of his great desire, was but the threshold to new activities and new outlets for his intense energies. Since the face and form of Mary Allan had first enraptured him in his little backwoods school district, a vast ambition had possessed his soul, and to-day, which had seemed to be its end, he now knew to be but its beginning. The ready consent of his betrothed to share his life in the unknown wilderness between the Red River and the Rocky Mountains had been a tide which, taken at its flood, might well lead him on to fortune. At the conclusion of his fall term he had resigned his position as teacher, and with his small savings had set about accumulating equipment essential to the homesteader. A team of horses, two cows, a few ducks, geese and hens; a plough, a wagon, a sleigh, a set of carpenter's tools; a gun, an axe, a compass, a chest of medicine, a box of books; a tent, bedding, spare clothing—these he had gathered together at the village store or at farmers' "sales," and the doing so had almost exhausted the winter and his money. Because his effects were not enough to fill a car he had "doubled up" with Tom Morrison, a fine farmer whose worldly success had been somewhat less than his deserts, and who bravely hoped to mend his broken fortunes where land might be had for the taking. Their car had already gone forward, with Morrison's hired man nestling obviously in the hay, and two others hid under the mangers. When railways were invented they were excepted from the protection of the Eighth Commandment.

So John Harris and his bride took the passenger train from her city home, while their goods and chattels, save for their personal baggage, rumbled on in a box-car or crowded stolidly into congested side-tracks as the exigencies of traffic required. At a junction point they were transferred from the regular passenger service to an immigrant train. Immigrant trains, in the spring of 'eighty-two, were somewhat more or less than they now are. The tourist sleeper, with its comfortable berths, its clean linen, its kitchen range, and its dusky attendant, restrained to an attitude of agreeable deference by his anticipation of a gratuity, was a grey atom of potentiality in the brain of an unknown genius. Even the colonist car, which has done noble service in later days in the peopling of the Prairie West, was only in the early stages of its evolution. The purpose of immigrant trains was to move people. To supply comforts as well as locomotion was an extravagance undreamed of in transportation.

The train was full. Every seat was taken; aisles were crowded with standing passengers who stumbled over bundles and valises with every pitch in the uncertain road-bed; wo-

Soothes Irritable Throat, Relieves Bronchitis Quickly

No Drugs to Take, No Medicine to Upset the Stomach. Just Breathe "Catarrhazone."

Count ten—a bad cold is relieved by Catarrhazone—wait one minute and you will feel its soothing influence on a sore irritated throat. No failure with "Catarrhazone"—it is effective because you can breathe a healing vapor to the very spot that needs help. The big thing to remember about Catarrhazone is this, you just breathe a healing piney vapor that is full of the purest balsams, that is rich in the greatest healing agents known to science. This wonderful vapor dispels all soreness, kills all germs gives nature a chance to completely destroy the disease. Colds and throat troubles can't last if the pure healing vapor of Catarrhazone is breathed. Catarrh will disappear, bronchial attacks will cease, coughs and winter ills will become a thing of the past. Complete outfit lasts two months, price \$1.00, smaller size 50c, sample size 25c, all dealers or the Catarrhazone Co., Montreal.

men fought bravely with memories too recent to be healed, and children crowded in lusty abandon or shrieked as they fell between the slippery seats. The men were making acquaintances; the communities from which they came were sufficiently interwoven to link up relationships with little difficulty, and already they were exchanging anecdotes in high hilarity or discussing plans and prospects with that mutual sympathy which so quickly arises among those who seek their fortunes together under strange conditions.

One or two of the passengers had already made the trip to Manitoba, and were now on the journey a second time, accompanied by their wives and families. These men were soon noted as individuals of some moment; they became the centre of little knots of conversation, and their fellow-immigrants hung in reverent attention upon every word from their lips. Their description of the great plains, where one might look as far as the eye could carry in every direction without seeing house or tree or any obstruction of the vision, fell with all the wonder of the Arabian Nights upon the eager company. Stories of the trail, of Red River cart and ox-team, of duck shooting by the prairie sloughs, the whiff of black powder from their muzzle-loaders and the whistle of sharp wings against the sky; of the clatter of wild geese which made sleep impossible, and the yelp of prairie wolves snapping up through the darkness; of thunder and lightning, of tempest and rain, of storm and blizzard and snow and cold—cold that crackled in the empty heavens like breaking glass and withered the cheek like fire; of Indians, none too certain, slipping like moccasined ghosts down the twilight, or peering unexpectedly through cabin windows; of hardship and privation and strength and courage and possibilities beyond the measure of the imagination—these fell from the lips of the favored oldtimes, punctuated with jest and prophecy and nicely-timed intervals of silence.

"And is there no stones there, or stumps?" asked a woman, big of bicep and deep of chest from years of wrestling with the rocks and timbers of Lanark. "Has the bush all been cleared away?"

"Bush? There's no bush to clear. The prairie's as bald as yer table—no reflection on yer cookin', ma good woman, but so it is, excep' for the grass that tickles yer fingers as ye walk an' the pea-vine that up-ends ye when ye're no thinkin'. Bush! Ah've burnt more bush from ma ten-acre clearin' than ye'll find in a dozen counties. 'Deed, ye'll think a little more bush 'd be a guid thing when ye have yer house to build an' a hungry stove to keep roarin' from November to April."

"But whereby do they make their fences, if they ha' no cedar rails?" demanded the woman, still unconvinced.

"Fences? An' why for would ye fence a farm, ye unsociable body? To keep the gophers out. Or to keep the badgers in? Seein' ye have all out-doors for yer cattle, an' the days of the buffalo are over, thanks to the white man's powder an' shot, what would ye have with fences?"

"But are ye sure it has no been all ploughed some time?" persisted the woman, who could not bring herself to believe that Nature, unaided, had left great areas ready for the hand of the husbandman. A life of environment amid forests and rocks had sorely cramped her imagination.

"Ah'm no saying for sure, but whoever ploughed it took a man's order. It will be a thousand miles long, Ah'm thinkin', an' nobody knows how wide. Pioneers like you an' me ha' been workin' our hands off in Canada" (it was a trick of the old-timers to think only of the Eastern Provinces as Canada), "an' in a hundred years we have no cleared what'd be a garden patch to that farm out yonder. Ah'm thinkin' it was a bigger hand than yours or mine that did that clearin'."

"Tell us about the crops," said one of the men passengers. "What like wheat can ye grow?"

"Like corn," said the narrator, with great deliberation. "Heads like ears o' corn. Wheat that grows so fast ye can hear it. Nothin' uncommon

to walk into wheat-fields when they's knee-high, an' have to fight yer way out like a jungle."

"Is the Injuns werry big?" piped a little voice. "Ma pa's go'n' to make me a bone-arrow so I can kill 'em all up."

"That's a brave soldier," said the man, drawing the child to his knee. "But Ah know a better way to fight Indians than with bows an' arrows. D'ye want me to tell ye a story?"

"S about Moses?"

"No, Ah ain't quite up-to-date on Moses, but Ah can tell ye a story about a better way to fight Indians than with arrows an' powder. Ah fight 'em with flour an' blankets an' badger-meat, an' it's a long way better."

The child climbed up on the friendly knee, and interested himself in the great silver watch-chain that looped conveniently to his fingers. "Go on wif your story, man," he said. "I's listenin'."

And big Aleck McCrae forgot the immigrants crowded around, forgot lurch of the train and the window-glimpse of forests heavy-blanketed with snow, as he ploughed his fertile imagination and spread a sudden harvest of wonderment before the little soul that clung to his great watch-chain.

Settlement Reached In British Coal Miners' Strike

Hoped That New Relations Will Now Be Inaugurated Between Capital and Labor.

London.—The prolonged stoppage in the coal industry ends by a settlement reached when the government agreed to renew its offer of a subsidy of £10,000,000 to avert the hardships of the next three months, because of necessary wage reductions, thereby conceding the one condition required by the miners in the settlement reached between the miners and the mine-owners.

By the terms of the new arrangement, a wage basis will come into effect for the next eighteen months, whereby the miners receive 20 per cent. above the pre-war scale of wages, with an additional share of profits on an agreed percentage basis which will be regulated by the creation of a national board and district boards.

The settlement is only a slight modification of the terms the miners rejected by their last ballot, and covers the period up to September 30, 1922, but either side must give three months' notice of a desire to terminate the agreement.

Announcing the settlement in the House of Commons, Mr. Lloyd George justified the granting of the

subsidy on the ground that the coal exporting districts were so hardly hit by the collapse of the export trade that, if economic conditions had full play, there would be unsupportable reductions in wages.

The settlement, he said, was a great and promising experiment; no such principles had ever before been applied in such a vast scale in any industry. He was hopeful that it would inaugurate new relations between capital and labor, not only in coal but in other industries, and he believed that if it was sincerely carried out with goodwill it would repay the nation for all the damage suffered through the dispute.

Germany to Return Railway Materials

Washington.—Germany has fulfilled her obligation to replace railway material taken by her armed forces from foreign countries during the war, according to advices received here in official circles. The Inter-Allied Railway Commission demanded that Germany deliver five thousand railway cars to France and Belgium, of which the former country is to receive 1,500 and the latter 3,500.

For Development of Canada

Col. W. Grant Morden, Deputy Chairman of the London Advisory Committee of Canada Steamship Lines, who, in a recent address, urged Canadian business men to be more active in pushing Canada's trade interests.

Mennonites May Not Move

Little Prospect of Exodus From Manitoba This Year.

Winnipeg.—A local government official declared here upon his return from the Manitoba Mennonite settlement that there is little prospect of a movement of Mennonites to Mexico or any other country from the province. He stated that less than 100,000 acres of the 1,000,000 held by Mennonites in Southeastern Manitoba is listed for sale, and up to the present time none of this has been sold nor prospective buyers secured.

Victory for Farmer Candidate

Medicine Hat Bye-Election Gives Gardiner Sweeping Majority Over Government Candidate.

Medicine Hat.—The United Farmers of Alberta forces scored a sweeping political victory in the Federal bye-election here, Robert Gardiner defeating Col. Nelson Spencer, the Government candidate, by a huge majority, which will probably reach the 8,000 mark when all the outlying polls are heard from. Spencer received majorities in only three or four polls of the 148.

It had been generally conceded that the farmers would poll a large vote in the country districts, but it was thought that the city of Medicine Hat would return a large majority for Spencer and that he would do more than break even in the smaller towns.

Develop Frozen Fish Trade

Urges Campaign to Sell Canadian Fish in Great Britain.

Ottawa.—An obstacle to the development of the trade in Canadian frozen fish on the British market is that during the open season for salmon in Great Britain, Canadian frozen salmon is sold as English and Scottish, but in the closed season, from September to February, the demand languishes, as salmon is supposed to be a summer fish.

This information is contained in a communication from J. Forsythe Smith, Canadian trade commissioner at Liverpool, to the weekly bulletin of the Department of Trade and Commerce. Mr. Smith advises an advertising campaign to sell Canadian frozen fish in the British Isles. He states that fish weighing from 7 to 14 pounds find the best sale.

Breaks Neck But Still Lives.

Chatham, Ont.—Some days ago John Jones fell off a motor truck and injured his neck. An X-ray examination revealed one of the vertebrae of the neck broken, but the nerve was untouched. Jones was immediately strapped to a piece of plank, and the attending physicians are now confident he will make a complete recovery.

Dry In Maritime Provinces.

St. John, N.B.—Reports from the surrounding country are to the effect that the vegetable crop will be light and prices high this year on account of the drought.

My First Dog Driving

By O-GE-MAS-ES (Little Clerk).

(Copyrighted)

I received orders in January of the year 1874 to start west with the Winter Packet of the Hudson's Bay Company and had purchased a nice team of young dogs with light cariole from a clerk who came in from Swan River. The packet man was a famous traveller and known far and wide as one of the best long distance runners in the northwest. Poor Johnny Beads, like so many natives, he did not stand civilization and went to his long home a year or so ago.

I had been a year in the Fort Garry sale shop and hated the confinement, and had made application on several occasions to be sent inland (as all the area outside the Red River settlement was called in those days), but the matter dragged, and at last, on threatening to resign, I had my way. So the long-looked for time had come at last, and I was really off for the unknown interior next day. I slept mighty little that night, having waking dreams of great prairie stretches covered with buffalo, high mountains and huge forests, with lakes as big as inland seas, and above all, thousands of really wild Indians. It seemed too good to be true. The morning came at last and what with delays in the office, closing up important despatches, it was after an early lunch before we left. I paid hurried good-bye's to all my friends, and received a hearty hand clasp from Chief Factor John H. McTavish. He was at that time the uncrowned king of Fort Garry and was one of the best chiefs I ever had. His last words to me were: "If you don't like it in the north there is always a place for you here."

Johnny called "Marche!" and away we went. His dogs were a fearsome sight and very savage. They were called Brandy, Grog, Rum and Whiskey. They were all from the plains, were used to travois, and were as big as large timber wolves, with split ears, and were grey and white in color. Both my young dogs and myself treated them with the utmost respect—at a distance—and they evidently had a contempt for us as green horns. He was loaded entirely with mail matter and, of course, dog food and provisions on top of this. His only bedding was a single heavy box which was carefully made of the thinnest and lightest of wood and he H. B. Co. white blanket. The packet was to take them to Fort Carlton on the North Branch of the Saskatchewan. This was a distance of between five and six hundred miles, with many a long stretch of plain and but little wood here and there. Other packet carriers met him at Carlton, and on went the great Northern Packet, only reaching some of the furthest posts on last ice. The greatest care was always taken of the precious mail matter.

My young train followed close behind his sleigh, and I noted Johnny studying my dog's gait from time to time. The first stop made was at Poplar Point (an H. B. Post), and Mr. Chisholm was hospitable as usual; in fact, too much so, as it was getting dusky before we pulled out for Portage. Just as we were hitching up, Johnny, who by the way stuttered badly, said "B-b-boy, your Herod (my foregoer) hauls too hard in front, so I will put him in the middle of my team and give you Bub-bub-Brandy ahead"; well, I was green and knew no better, so he very quickly made the exchange, threw himself on his sled and was off like a flash. When I called, "Marche!" the dog sat down on the road and eyed me with a wicked look. I took a step towards him and shook my whip. His reply was to advance in my direction growling savagely, so I retreated. Well, I was in a quandary. Pride forbade me going in and asking for Chisholm's assistance. Suddenly I noted the fence, and taking a good-

sized rail off it, crept up to the rear of the train, balanced the rail on end carefully, then sighting between old Brandy's ears, let it fall. My aim was true, and it bowled him over. With dreadful howls he sprang to his feet and started after my companion at a gallop, I just managing to throw myself in the cariole. Catching up with Johnny at last, I noted he was shaking with merriment, and on stopping for a smoke, he said: "Bub-bub-boy, what did you do to Bub-bub-Brandy?" We had a great laugh over it, but in future I kept my own dogs.

We Meet at Bourgeois.

We reached Portage about nine that night, and Mr. Jas. Hargrave made us very welcome as is usual amongst Hudson's Bay men. Next day we camped at White Mud River, where was one Jimmy Whiteway, postmaster, and here we met my new chief, Factor Archie McDonald, king of the Swan River district. He was by no means prejudiced in favor of Canadians as by far the majority of the officers and men of the H. B. Co. at that time were Scotch, and very clannish at that. Johnny Beads started early next morning for his long trip across the plains and I accompanied Mr. McDonald and party on his inspecting trip. Up to this time I had an easy time with my light cariole, but conditions were changed and my dogs were loaded to capacity, so it was me for the road. Jeune-Homme, a young French half-breed, who was guide, fortunately took a fancy to the young tender foot, and at once christened me Ogemases, meaning little clerk. He had overheard the bourgeois say, "Well, we will see what kind of stuff this little Canuck is made of and he can head the party tomorrow."

It was a good thing for me the day was a short one, only some thirty miles, as I was running the whole distance. If you want to know what it was like, just watch a dog trotting beside a rig and you follow him and keep that up for thirty miles. Luckily for me the track was hard and snowshoes not needed. Oh, boy, but I was tired that night and my legs cramped with the unusual exertion, and it seemed that just about the time I fell asleep the call was made to get up again. This was my first introduction to an abominable habit customary with the big men of the company at that period. The guide called all hands between three and four in the morning, dogs were hitched and away we went, the bourgeois at once going to sleep in his cariole, while us poor beggars trotted along. There was no sign of daylight, it was very cold, and our stomachs were fairly grinding for something to eat. In my own case I was stiff and sore from the unusual exertions of the day previous. I also had a sharp pain in one heel. Would daylight never come. Talk about an appetite, mine was like a raging wolf. Well, after a long three hours, the guide called a halt, a huge fire was made and we runners breakfasted mightily on bannock and raw pemican, with oceans of black tea. I told Jeune-Homme on the quiet that my heel was stinging me, and he at once pulled off my moccasins and socks. There was a crack in the hard skin of the heel over an inch long, and this would naturally open every step I took. "Oh, boy," he exclaimed, "I will soon fix that." Taking off his fur cap, in the crown of which was a square needle (really a three-cornered glove's) threaded with deer sinew, and holding my foot tightly, he put in three or four stitches. He then covered it with spruce gum, placed some cotton on this, and it bothered me no more. I remembered this recipe and used it afterwards on many occasions.

(To be continued)

Agree On Peace Pact.

Washington.—A compromise draft of the Knox-Porter resolution to end the state of war between the United States and Germany and Austria, was agreed upon by Republican conferees of the Senate and House.

Give your local merchants a chance. Buy at home.

Crops Burning Up In South Dakota.

Fargo, N.D.—Weather conditions during the past few days around Buffalo, N.D., have been very bad. Dry, hot winds are drying crops fast. There are many traces of black rust, south of the town, crops are in a serious condition and several hundred acres will be plowed up.

Fine Ripe Tomatoes & Best Spices

CLARK'S TOMATO KETCHUP

Just a dash adds zip to the stew or fish, etc. The well spiced and seasoned fine ripe tomatoes are a wholesome and tasty relish. Made from Canadian Produce and sold everywhere in Canada.

Overland \$985

Rock-Bottom Prices Now in Effect:

Touring Car and Roadster ... \$985
Coupe \$1495
Four - Door Sedan \$1695

F.O.B. Toronto—Sales Tax Extra

PEOPLE are just beginning to realize what a wonderful car the new Overland really is

IMPORTANT FEATURES OF 1921 OVERLAND

Perfect 4-cylinder engine, powerful yet economical. Owners report 25 to 35 miles to gallon of gas.

Standard sliding gear transmission, 3 speeds forward, 1 reverse.

Triplex Springs, making it easy riding and easy on tires.

One-man top and side curtains opening with doors.

Two separate rod-controlled sets of brakes.

Spiral-cut drive gear and pinion.

Auto-Lite starter.

Demountable rims.

British Admiralty Pursues A Courageous Policy Of Most Rigid Economy

Great Britain is building four new battleships and orders for these have already been placed. It will be recalled that these new ships were included in the naval estimates, announced some little time ago, and are to replace those of an obsolescent type. Three years will be necessary to make the ships ready for sea and the approximate cost of each ship will run to \$9,000,000. In this announcement there is nothing to cause undue excitement, it being merely the sequence of a well-considered Admiralty scheme, which does not in any way involve a race in armaments. A diagrammatic statement is available of the number of battleships under the jurisdiction of the three leading naval powers, representing their position in the present year and what it will be in the year 1924, assuming that the four new British battleships are completed by that time. It reads:

	1921	1924
United States	17	33
Great Britain	32	36
Japan	11	17

It should not be forgotten that naval power consists as much in men as of ships, and in this connection it may be recalled that when Mr. Walter Long was First Sea Lord last year, he stated that the establishment of the British fleet should be 127,500, including officers and men. So far as ships are concerned, the British Admiralty has pursued a courageous policy of rigid economy since the close of the late war. Of the vessels which were under construction at the time of the armistice many hundreds were scrapped, and following that action, the Admiralty sent to the ship-breakers' yards almost a couple of hundred completed vessels, embracing many classes of battleships, all considered more or less obsolete.

In the past Great Britain maintained a two-power standard and afterwards built to maintain a 60 per cent. superiority over Germany, whereas now a one-power fleet is all that is aimed at. The British Admiralty, by its moderation, has set an example consistent with the new ideals embodied in the League of Nations.

The Change in Manners

Boston Professor Deplores the Modern Trend in Slip Shod Manners.

Boston's most distinguished octogenarian, President Emeritus Chas. W. Eliot, of Harvard, is discussing the manners of men and women. He says that he has watched young women and "ladies" for three generations, and their habits have changed tremendously since he was a young man! He says that young men and women do things now that would have been "simply out of the question" when he was young man. He says the girls expect young men to be rude. He says that young men and women are coarse even in their greetings and farewells nowadays. He admits that "an old-fashioned person like me" may misjudge youngsters of today, and he tries to hope that the change of manners is for the better.

Dr. Eliot's remarks were made in an address to the Society of Harvard Dames in Cambridge, the other day, and were printed in the Harvard Alumni Bulletin.

New H. B. Store For Victoria.

The new Hudson Bay Company building at Victoria, B.C., represents an investment of \$2,000,000, and the fixtures, which are mahogany, another \$500,000. There will be forty departments employing between 250 and 300 people. Goods valued at \$1,000,000 have been purchased in England, and will be in the store when opened for business in August.

Country Clergyman (to local man of all work): I want you to put up some wallpaper I have bought. When can you do it?

Well, sir, you see, I'm rather busy just now. Hung Mrs. Smith yesterday; hanging your churchwarden today; but if it's convenient I'll pop round and hang your reverence on Wednesday.—London Ideas.

W. N. U. 1375

Dollar's Purchasing Power

Is Slowly but Surely Coming Back to Normal, Say Financiers.

Purchasing power of the dollar, based on current prices, was 100 cents when the world war began. In July 1915, a year later, it was worth 99 cents; in 1916 its purchasing power was but 91 cents, and it shrank faster and faster. July, 1917, found it at 73 cents; July, 1918, at 66 cents; July, 1919, at but 55 cents. In January, 1920, it was worth 50 cents; in April, 48 cents; in July, 47 cents—and then came business collapse. By December the purchasing power of a dollar had crept back to 54 cents, and now, if you happen to have a dollar, you will find it has increased in buying vitality since the first month of this year about 80 per cent. So the financiers figure, and they have studied the matter. Just the same, purchasers of commodities in certain towns will not accept the figures at their face value.

British Columbia Forests

Total Value of Forest Products for 1920 Was \$92,628,807.

Federal and Provincial Government reports show that British Columbia contains approximately half of the saw-timber of Canada. The total value of the forest products of the province for the year 1920 was \$92,628,807, as against \$70,285,094 for the previous year. The value of the lumber cut advanced by nearly sixteen millions, while the increase in the value of pulp and paper amounted to over nine millions.

Take Census of Blind.

As part of their peace-time programme a census of all blind persons in Saskatchewan is being carried on by the Provincial Red Cross Society. The work is being done for the Canadian National Institute for the Blind, and was undertaken by the Saskatchewan advisory committee for this organization, the Red Cross lending its facilities to secure the information.

Beaver Farm in Alberta

One of the Largest Beaver Farms in the West on Ribstone Creek, Near Edgerton.

F. F. Parkinson, who has a farm two miles east of Edgerton on the Ribstone Creek, has probably one of the largest beaver farms in Western Canada, says the Edmonton Bulletin. Although beavers have become almost extinct in most parts of the west, under government protection during the past five or six years they have multiplied in the Ribstone Creek very rapidly and at the present time in parts of the stream where conditions are suitable they thrive in large numbers. The Ribstone Creek runs through a part of Mr. Parkinson's farm for a distance of nearly a mile. The creek, which is only from twenty to thirty feet wide is bordered for the most part with poplar and willow which furnish a supply of food, and wood for building their dams, as well as a protection. In this section of the stream it is estimated that there are several dozen beavers. Occasionally a beaver is seen at work, but it is impossible to determine the number, except by the evidence of trees being cut down and stored for food and the dams built.

The beavers are kept from moving up or down stream by a fence made of wire, built below and above the section of the stream which they inhabit. Mr. Parkinson intends to build a fence along both sides of the stream as well.

Beavers have been under government protection for a number of years, but special arrangements have been made in the case of beaver farms whereby the furs are sold through the provincial game guardian by tender, twenty-five per cent. of the sale price being retained by the government. From the standpoint of profit beaver farming ranks favorably with any other line of fur farming. They more than double in number every year and on an average the furs sell for \$50 each. This year, owing to the low prices of all furs the price is somewhat lower.

Young Lady (on first visit to a Western ranch):

"For what purpose do you use that coil of line on your saddle?"

Cowboy: "That line, as you call it, lady, we use for catching cattle and horses."

Young Lady: "Oh, indeed! Now, may I ask, what do you use for bait?"

World's Wheat Supply Expected To Be Short According To Experts

The Glacial Period

Life of Glacial Age is a Puzzle to the Scientists.

When did the Glacial Period end? Was it an American scientist pertinently asks, when the ice began to disappear, or had half disappeared, or had entirely disappeared? asks Answers.

If the last mentioned, then we are still in the Ice Age, for Europe has its glaciers, and so has Labrador, the Rockies, Alaska and islands in the Arctic regions, and, as every school boy is aware, Greenland is nearly covered with an ice-cap.

Can the question be settled by a reference to climate? If so, then the Glacial Period ended for, say, the Ontario region at the beginning of Lake Iroquois, for its trees belonged to a cold, temperate climate.

Probably the point is best settled by making the Glacial Period a progressive event, regarding it as ending in one region perhaps thousands of years before it ends in another.

Without doubt, this far-off epoch of thick-ribbed ice constitutes one of the great mysteries of the world's history. It is absolutely hedged on with uncertainty.

Though it is generally believed that there was more than one Ice Age, no one can say with any degree of certainty whether there were three, four, or six, or a dozen, for the matter of that.

And the deepest of all mysteries connected with one or any of these icy periods is what was the cause of them. Both geologists and astronomers have, so far, failed to solve that problem. It is not yet even agreed as to what extent the ice-cap covered the globe.

Bound to Get Him.

The Motorist.—Say, friend, my engine's stalled. Think you can help me find out what's the matter with it?

Constable Talltimber.—I can, but I won't just now. I can't pinch you for speedin', but in ten minutes I'll fix up your engine and then pinch you for parkin' here too long.—Houston Post.

EXTERMINATE THE GOPHER

Diagram Showing Lay-Out of Gopher Holes and Methods of Rodents in Storing Winter Wheat.

Coal Licenses in B. C.

During 1920 Twelve Coal Leases, Covering 7,680 Acres, Were Issued.

During the fiscal year 1920, 275 coal prospecting licenses were issued in British Columbia, covering an area of 126,500 acres, as compared with 112 licenses in the previous year and 72 in 1918, according to Hon. T. D. Pattullo, Minister of Lands. The fees paid on account of these licenses totalled \$33,381. Twelve coal leases, covering 7,680 acres, were issued during the year, as compared with one lease in the previous year and three in 1918. Revenue on account of coal lease rentals received during the year was \$52,427, and the total received under the Coal and Petroleum Act \$88,411.

Bless Her Heart.

Little Girl.—Papa, it's raining.
Papa (whose temper is somewhat ruffled).—Well, let it rain.
Little Girl (timidly).—I was going to, papa.—Pearson's Weekly.

Alberta's Population

Is Placed at 620,000 by Provincial Statistics Branch.

Alberta's population is put at 620,000 by the provincial vital statistics branch. That figure has been made up on the basis of the births and deaths during the year 1920, the official report of which has just been issued.

Births in the province in 1920 numbered 16,565, a net decrease of 2,435 over those of 1919. The record for any one year had previously been held by 1918, but this last report goes beyond that record by 1,675. The birthrate per thousand of population was 27.72.

Edmonton and Calgary ran almost neck and neck in the birth race with 2,339 and 2,369, respectively. Children born of British stock predominated in both cities, and particularly in Calgary, where the figures were 1,099 British, and 727 Canadian. In Edmonton the births were 902 of British stock and 816 Canadian.

Forestry Patrol By Aircraft

Machines Will Be Loaned to Companies Interested in Experiment.

The value of lighter-than-air aircraft for forestry patrol and similar work in Canada will, it is expected, be demonstrated during the present flying season by several Canadian lumbering firms, working in co-operation with the Canadian Air Board. The machines, which are equipped with 100 horse-power Rolls-Royce engines, will be loaned to the various companies interested in the experiment by the Air Board. It is expected that eight complete machines will be in operation in different parts of the Dominion during the year.

Not Even a Comber.

A man sat in a fashionable coiffeur's shop with his little daughter while his wife was having a marcel wave put in her hair. Stroking her father's gleaming head, the child suddenly piped:
"No waves for you, Daddy. You're all beach."

Favorable crop reports for most of the world, published by the International Institute of Agriculture, are being interpreted as pointing to an easy situation in the international bread supply. Nothing is further from the fact. The usual amount of wheat is not standing in the fields, and even the most favorable weather conditions cannot assure a full supply of bread. On the other hand, unfavorable weather in North America before harvest or drought in the southern continent any time before December would seriously reduce the world's loaf, which, at the best, will not be of normal size.

An increased acreage in Europe has been referred to as an important factor in the wheat situations. Every such increase, as that of Italy, for instance, is an encouraging indication of a country's economic progress toward recovery. But the sum total is a bagatelle when weighed in the international balance.

It is good to think that France has 12,000,000 acres of wheat, and that "the crop situation is excellent." This is an increase of 600,000 acres over 1920. But the normal acreage is 16,000,000. France is now on its pre-war consumption of 7.9 bushels per capita, requiring 340,000,000 bushels of wheat. Last year it raised two-thirds its requirements, and will do about the same this year.

Rumania, which now includes Bessarabia and Transylvania was a large exporter of wheat. The acreage this year is cut one-half, and there will be no wheat for export. Germany must make a poor showing when compared with 1914, and so must all Eastern Europe. In fact, the countries of Europe and North Africa, included in the report of the International Institute of Agriculture which has been received with so much optimism, have a large acreage that is less than three per cent. above 1920. Compared with 1914 the acreage is reduced 35 per cent.

This same authority has counted the world supply, and calculates that by July 31 the world stock of old wheat will be 52,000,000 bushels, which is one-third what the United States alone held last year. What does that figure show? It proves that the accumulations since the armistice have been consumed, and last year the world ate more wheat than it produced.

India's acreage is 6,000,000 less than last year, and the crop is so poor that, instead of exporting, the country may import wheat before the end of the year. Official reports show a large crop of winter wheat in the United States, and weather conditions are mainly favorable in the Northwest and Canada. The Southern continent's harvest is still on the knees of the gods, and will be until January. Crop reports must be read with the fact in mind that this hemisphere and Australia are the world's dependence now, and an easy world situation cannot be expected.—Wall Street Journal.

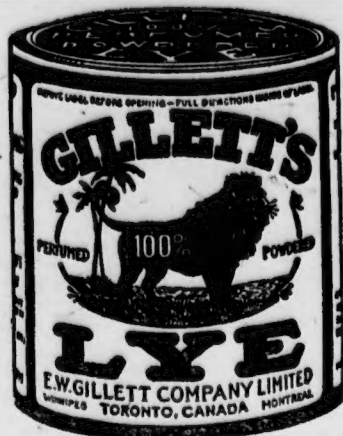

Dairies Are Profitable

Dairy Production the Most Profitable of all Farming Ventures.

Admitting that the dairy farmer had suffered most severely of all agriculturists by the present decline in the price of his products, Professor A. L. Leitch, of the Ontario Agricultural College, Guelph, addressing 300 members of the Southern Counties Ayrshire Breeders' Club at their annual picnic, declared that dairy production was the most profitable of all farming ventures. Professor Leitch advised against dairy men giving up dairying and going into fruit farming, even though butter had declined from 60 cents to less than 25 cents in six weeks.

The patriotic man is loyal to his country and to the community in which he lives. If he is consistent he will give first preference to Canadian made goods when making purchases. He will also stand loyally by his local dealer.

There are some widows who will not flirt—but they are usually deaf and dumb.

World Happenings Briefly Told

Massachusetts boasts of a woman of 84 who has never seen a trolley car.

Miss Sadie Mossell, a young negro woman, received the degree of Doctor of Philosophy at the University of Pennsylvania, the first negro woman in the U.S. to be so honored.

Opening prices of California wine grapes this year have been set at \$50 to \$90 a ton, compared with \$40 and \$50 in pre-war prohibition days.

During a thunderstorm at Gibraltar recently a shower of frogs fell on the North Front. Thousands of these small hopping creatures were to be seen in the hedges and aroused much curiosity.

R. M. Maxwell, president of the G.W.V.A. has definitely announced the postponement of the annual convention of the G.W.V.A. until the fall. The convention was to have been held at Port Arthur commencing July 4.

Canada's export trade with the Argentine republic shows great expansion, according to the weekly bulletin of the Department of Trade and Commerce. Since the year 1913 it has quadrupled and now stands at approximately \$8,000,000 per annum.

Internal parasites in the shape of worms in the stomach and bowels of children sap their vitality and retard physical development. They keep the child in a constant state of unrest and, if not attended to, endanger life. The child can be spared much suffering and the mother much anxiety by using a reliable worm remedy, such as Miller's Worm Powders, which are sure death to worms.

Grading of Dairy Products

The Proposed Grading Regulations Apply to Export Only.

A bill to standardize the grading of dairy products has been introduced in the House of Commons. Replying to questions, Dr. Tolmie said the proposed grading regulations would apply to export only. The Dairy Commissioner, he added, estimated that it would take a year for the campaign of education necessary before the system could go into operation.

A Friend To the Aged!

When men and women get past middle life, their energy and activity, in many instances, begin to decline, and their general vitality is on the wane.

The heart action becomes weak and uncertain and the nerves more or less unsteady.

Little sicknesses and ailments seem harder to shake off than formerly, and here and there evidences of a breakdown begin to appear.

Those who wish to maintain their health and vigor and retain their energy unimpaired should use Milburn's Heart and Nerve Pills.

They make the heart beat strong and regular, brace up and invigorate the nervous system, improve the memory, and impart a sense of buoyancy to the entire system.

Mrs. James Perry, Rellaw, Alta., writes:—"Some months ago I was not feeling well, my heart bothered me quite a lot, and my whole system seemed out of order. I sent and got two boxes of your pills. I took them a few days and my, what a change there was in me, and when I had taken the two boxes I felt so much better I quit them. Now I take them at intervals, and am fine although 72 years of age."

Price 50c a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

The Search For Oil

Imperial Oil Co. Spends Huge Sum In Drilling For Oil.

According to A. M. McQueen, of the Imperial Oil Company, his company has expended to date more than two million dollars in making preparations, bringing in machinery and well drilling crews, and organizing gangs of drillers who are putting down holes from the international boundary north, almost to the Arctic Ocean. In addition to this, the Imperial Oil Company has erected its own machine shop in Calgary, and is doing all repair work on its drilling outfits used in Alberta and Saskatchewan.

Corns Between the Toes Painlessly Removed

A real, sure, dependable remedy that has been lifting out corns for the past fifty years will surely lift yours out. Putnam's Corn Extractor is the old reliable corn remedy—it stands the test of time and never fails, 25c everywhere.

Many Settlers Arriving

Seventy-Five Families Take Up Land in the Lloydminster District This Season.

The flow of newcomers which the spring ushered in for the Lloydminster district is continuing unabated, and to date some seventy-five families have arrived and acquired land. Two or three times this number is expected before the end of the farming season. In addition to the marketing of five thousand head of cattle, two thousand hogs, and eight hundred sheep, more than two million bushels of grain were shipped from this district last year. An increase of fifty per cent. in the wheat yield from the increased acreage is expected this year.

Cheapest of all Oils.—Considering the qualities of Dr. Thomas' Electric Oil it is the cheapest of all preparations offered to the public. It is to be found in every drug store in Canada from coast to coast and all country merchants keep it for sale. So, being easily procurable and extremely moderate in price, no one should be without a bottle of it.

Plan Your Vacation Trip

Special Summer Tourist Fares to the Pacific Coast.

Special Summer Tourist tickets to Vancouver, Victoria, Seattle and other Pacific Coast points are now on sale daily by the Canadian Pacific Railway. These tickets will bear a final return limit until October 31st, and permit stopovers en route, which gives travellers an opportunity of visiting some of the beautiful resorts in the Rockies, such as Banff, Lake Louise and Glacier, where the Company maintain splendid resort hotels. These tickets are optional via the main line or Arrow Lakes route in one or both directions without extra charge. No expensive side trips necessary.

In addition to the "Trans-Canada Limited" exclusive sleeping car train, a choice of two other daily trains is offered, and as all are equipped with open-top observation cars through the mountains an excellent view of the magnificent scenery may be had.

Any Agent of the Canadian Pacific will be pleased to give further particulars and make the necessary arrangements for the trip.

Northern Light Railway.

The first sod on the proposed Northern Light Railway will be turned soon at Swastika, Ont., from which point construction will commence both east and west. The proposed line is 103 miles in length, and will penetrate the newly discovered mineral fields in Northern Ontario. This line will also connect with the Temiskaming and Northern Ontario Railway at Elk Lake.

Value of Canadian Fisheries.

The fisheries production of Canada for the year 1920 reached a value of \$49,321,217, according to a return just issued by the Dominion Bureau of Statistics. British Columbia's fishing industry accounted for \$44,300,000 of the total and Nova Scotia for \$12,700,000.

Bacon is more than twice as valuable as rump steak, from the nutritional point of view.

Minard's Liniment for sale everywhere

EVERY WOMAN IN POOR HEALTH

Has an awful struggle. Lots to do, all kinds of worry, poor appetite, headaches, weakness. Her one desire is for more strength and better health. What sickly worn out women need is a cleaning, blood purifying remedy like Dr. Hamilton's Pills. This wonderful medicine clears out the wastes from the system, regulates the bowels, helps the blood. To look your best, to feel fit and fine all day, to be free from lassitude and headache, use Dr. Hamilton's Pills regularly. 25c at all dealers or The Catarrhzone Co., Montreal.

Swede Prince Breaks Records. All hitherto hunting and trapping records have been smashed by Prince William, son of the King of Sweden. Press agents credit the Prince with trapping single-handed 24 gorillas, 14 lions, and many other animals, which he is bringing back from the interior of Africa to present to the Stockholm Museum.

SAVE THE CHILDREN

Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather. Stomach troubles, cholera infantum and diarrhoea carry off thousands of little ones every summer, in most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets relieve these troubles, or if given occasionally to the well child will prevent their coming on. The Tablets are guaranteed by a government analyst to be absolutely harmless even to the newborn babe. They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Radium For Toronto.

Toronto General Hospital has bought 150 milligrams of radium from the Radium Chemical Co. of Pittsburgh, the largest amount owned in Canada by any institution. It is the maximum amount required for treatment of any cases. Heretofore the hospital has not owned any of this precious substance which will now be used in treatment of cancer cases.

Yarmouth, N.S., March 24, 1921.

Mr. Joseph LeBlanc, Secretary of the Athletic Association, who were the Champions for 1920 of the South Shore League and Western Nova Scotia Base Ball, states that during the summer the boys used MINARD'S LINIMENT with very beneficial results, for sore muscles, bruises and sprains. It is considered by the players the best white liniment on the market. Every team should be supplied with this celebrated remedy.

(Signed) JOSEPH LeBLANC, Sec'y. Y. A. A.

Our slogan for the coming year should be, "Buy at Home." Add to your own and your neighbor's prosperity by keeping the money circulating in our own district.

DO ALL MY HOUSE WORK

Before I took Lydia E. Pinkham's Vegetable Compound I could hardly get about.

Cobourg, Ont.—"For many years I have had trouble with my nerves and have been in a general run down condition for some time. I could not do my work half of the time because of the trouble with my monthly sickness. I was told of Lydia E. Pinkham's Vegetable Compound by friends and advised to try it. It has done me good, and I strongly recommend it. Since I have taken it I have been able to do all my own work, and I also know friends who have found it good. You can use these facts as a testimonial."—Mrs. ELLEN FLATERS, Box 761, Cobourg, Ont.

Why will women continue to suffer so long is more than we can understand, when they can find health in Lydia E. Pinkham's Vegetable Compound?

For forty years this good old fashioned root and herb remedy, which contains no narcotics or harmful drugs, has been the standard remedy for female ills, and has restored the health of thousands of women who have been troubled with such ailments as displacements, inflammation, ulceration, irregularities, etc.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

A Negligee Of Coral Handkerchief Linen

By Marie Belmont.

Cool and inviting is this dainty negligee for summer days. It is fashioned from coral handkerchief linen, although you might develop it in any other shade you desire. If you preferred you might even use a pastel shade of satin or combine two shades of chiffon. It is cut all in one piece and an oblong piece is removed so that the negligee may be slipped over the head. This is outlined with coral embroidery. The sides are similarly adorned. They are fastened together under the embroidery to a point just beyond the waistline. About the shoulder the linen falls in pleasing lines. The satin sash and net finish add to the beauty of this model.

No surgical operation is necessary in removing corns if Holloway's Corn Remover be used.

Where World Gets Lumber

Canadian Vessel Clears Vancouver With Over Five Million Feet of Ties and Lumber for Japan.

The biggest cargo of lumber that ever sailed from the port of Vancouver left recently on the Canadian Government steamer, Canadian Highlander. She had aboard 5,100,000 feet of ties and lumber for Kobe, Taku Bar and Nuchwang, Japan. There have been many three and four million foot cargoes sent from Vancouver in the past few years, and the Canadian Robert Dollar Company's big steamer, Robert Dollar, sailed recently from Puget Sound with 6,000,000 feet, but only 3,200,000 of this was loaded at Vancouver. One of the Coghlan steamers, operated by that company, took 4,800,000 feet last year, and that was the record until the Canadian Highlander's cargo.

Worms cause fretfulness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Expeller will clear the stomach and intestines and restore healthfulness.

Butter Output Increased.

The province of Saskatchewan has doubled the output of dairy butter during the past year. The total output for the first five months of 1921 was 671,174 pounds in comparison with 340,268 pounds for the same period in 1920, an increase of 331,906 pounds.

Asthma No Longer Dreaded. The dread of renewed attacks from asthma has no hold upon those who have learned to rely upon Dr. J. D. Kellogg's Asthma Remedy. So safe do they feel that complete reliance is placed on this true specific with the certainty that it will do all that its makers claim. If you have not yet learned how safe you are with this preparation at hand get it to-day and know for yourself.

Going Up

She.—You used to say that Mary was such a sweet, pensive little girl. He.—Well, she soon got over that; you might say that she became expensive.—Pitt Panther.

CUTICURA PROMOTES THICK HAIR

Cuticura Soap shampoos preceded by touches of Cuticura Ointment to spots of dandruff, itching and irritation are most successful. These fragrant emollients save the hair, clear the skin and meet every want of the toilet and bath.

Soap 25c. Ointment 25c and 50c. Talcum 25c. Sold throughout the Dominion. Canadian Depot: Lyons, Limited, 344 St. Paul St., W., Montreal. Cuticura Soap shaves without mug.

Silos In Alberta.

Much activity in building silos is reported by a Lethbridge firm, which has disposed of eighteen this year. It is estimated that between two hundred and four hundred silos will be erected in that district this summer.

Hall's Catarrh Medicine

Those who are in a "run down" condition will notice that Catarrh bothers them much more than when they are in good health. This fact proves that while Catarrh is a local disease, it is greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a Tonic and Blood Purifier, and acts through the blood upon the mucous surfaces of the body, thus reducing the inflammation and restoring normal conditions. All druggists. Circulars free. F. J. Cheney & Co., Toledo, Ohio.

Balfouria, a small agricultural colony in Palestine, is named after the Rt. Hon. A. J. Balfour.

Simple and Sure.—Dr. Thomas' Electric Oil is so simple in application that a child can understand the instructions. Used as a liniment the only direction is to rub, and when used as a dressing to apply. The directions are so plain and unmistakable that they are readily understood by young or old.

The American bale of cotton is 500 lbs.; the Egyptian, 700 lbs.; and the West-African, 400 lbs.

IMPOUNDED in the Municipal
Pound kept by Gottlieb Ohlhauser,
on the N.W. 1/4, Sec. 25-2-23-4,
June 14th, 1921: One Gray Gel-
ling branded 'N' S on left hip. One
Bay Gelding, branded 'H' E on left
shoulder.

Mr Harry M. Thorburn wishes
to thank the many friends for their
sympathy in his sad bereavement.

Rev. Robertson will be absent
from his pulpit and the community
for two weeks, he is having his
tonsils removed.

Mr M. Pipe, whose services
were so much enjoyed last winter,
will preach at Carbon, Gamble and
Swallow next Sunday.

Children who are attending
Church will have their cards punch-
ed when their regular minister is
back.

Mrs D. F. R. Robertson went to
Calgary on Thursday of last week
with her daughter Mary, for medi-
cal treatment. Her trouble is a
development from Infantile Paraly-
sis, an attack which she suffered
from ten years ago.

There will be mass at the Catholic
Church on the 10th of July at 9.30
a. m. and after, every last Sunday
of the month at 10.30 a. m.

Mr P. Turcotte was a weekend
visitor to Carbon.

Mr and Mrs Charlebois and their
son and daughter were visitors to
Carbon last week.

We are glad to see Miss Bertha
Charlebois back in Carbon with
her again.

LIBERAL CON- VENTION

The Liberal Convention was
held on Monday afternoon at 2
p.m. at Didsbury, for the nomi-
nation of a liberal candidate for the
riding. Delegates from all over
the district assembled in the Mov-
ing Picture Hall. The convention
was opened by Mr Reid, who pro-
posed the nomination of a chair-
man; Dr Christie being elected by
acclamation. A committee of three
was then appointed to verify the
credentials, after which the nomi-
nation for candidates was open.
The first delegate who addressed
the convention was Mr Gough from
Drumheller, who after a long
speech proposed Mr Webber as a
candidate for this riding. Mr Web-
ber then addressed the convention
and outlined in a few words what
he had done and what he would do
if elected and made also a few
attacks on our ex-member, Harry
Atkins who was also nominated.
Explained his work and his stand-
ing with the Government, and not-
withstanding the great support and
following, declined the nomination.
It was a surprise to many of his
supporters and more than 75 p.c.
left the Hall when Mr Atkins
withdrew his nomination. We are
sorry to see Harry Atkins throw-
ing up the fight, as the Govern-
ment loses a true supporter and a
true liberal, but we do admire in
him the MAN. It is so seldom
we meet a man who stand up for
a principle and who rather loses
out on a principle than win by
trickery. We are too much ac-
customed to see man-tools and man-
things in organizations, cliques
and clans, that it was a treat for
us to meet there a 'Man'. Harry

Atkins has been a clear, honest
and true politician, living for
clean principles and for a clean
country. As there were no further
nominations, Mr Webber, of Drum-
heller, was nominated by acclama-
tion, and we don't doubt will re-
ceive the support from every loyal
liberal and Stewart supporter. Mr
Webber has a good clean record
behind him, and we don't doubt,
if elected, will make a good rep-
resentative for this large consti-
tuency.

FARMERS CONVENTION

The Farmers Convention will be
held in Acme on Friday afternoon,
to elect a candidate for the next
Provincial elections. We will give
full particulars in next week's is-
sue as this paper is printed on
Thursday. A great enthusiasm is
shown all over this district and we
may be assured that this conven-
tion will be lively and interesting.
The Farmers mean business this
year and whoever runs in oppo-
sition to them will have to put up a
fight.
